

Nama : Farhan Syahbana Putra
NIM : 242410101016
Kelas : A
Mata Kuliah : PWEB

Aktivitas Mandiri 5

Notes: Saya sesuaikan dengan Proyek Akhir saya

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app>
```

1. Buat Resource Controller: php artisan make:controller MahasiswaController --resource --model=Mahasiswa

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app> php artisan make:model Booking -m
INFO Model [D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app\app\Models\Booking.php] created successfully.
INFO Migration [D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app\database\migrations\2026_05_12_055214_create_bookings_table.php] created successfully.

PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app> php artisan make:controller BookingController --resource --model=Booking
INFO Controller [D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app\app\Http\Controllers\BookingController.php] created successfully.
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app>
```

2. Daftarkan di routes/web.php: Route::resource('mahasiswa', MahasiswaController::class)

```
hunny-app > routes > web.php
1 <?php
2
3 use Illuminate\Support\Facades\Route;
4 use App\Http\Controllers\DashboardController;
5 use App\Http\Controllers\BookingController;
6
7 // --- FRONTEND / CUSTOMER ---
8 Route::get('/', function () { return view('beranda'); });
9 Route::get('/customer', function () { return view('customer'); });
10 Route::get('/pembayaran', function () { return view('pembayaran'); });
11 Route::get('/pesanan-saya', function () { return view('pesanan-saya'); });
12 Route::resource('booking', BookingController::class);
13
14 // --- HALAMAN UTAMA LAYOUT MASTER
```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)
 - a. index.blade.php

22 <h2 class="text-xl font-bold text-white">{{ \$booking->nama_hewan }}</h2>

23 <p class="text-white/80 text-sm">{{ \$booking->jenis_hewan }}</p>

4. Implementasi method index() — ambil semua mahasiswa dengan paginate(10) dan tampilkan ke view
- a. Controller

```
hunny-app > app > Http > Controllers > BookingController.php
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use App\Models\Booking;
6  use Illuminate\Http\Request;
7  use Illuminate\Support\Str;
8
9  class BookingController extends Controller
10 {
11     public function index()
12     {
13         $bookings = Booking::latest()->paginate(10);
14         return view('booking.index', compact('bookings'));
15     }
16
17     public function create()
18     {
19         return view('booking.create');
```

b. Migration

```
hunny-app > database > migrations > 2026_05_12_055214_create_bookings_table.php
1  <?php
2
3  use Illuminate\Database\Migrations\Migration;
4  use Illuminate\Database\Schema\Blueprint;
5  use Illuminate\Support\Facades\Schema;
6
7  return new class extends Migration
8  {
9      /**
10       * Run the migrations.
11       */
12     public function up(): void
13     {
14         Schema::create('bookings', function (Blueprint $table) {
15             $table->id();
16             $table->string('kode_booking')->unique();
17             $table->string('nama_pemilik');
18             $table->string('email')->unique();
19             $table->enum('jenis_layanan', ['Basic Grooming', 'Full Grooming', 'Spa & Treatment', 'Nail Trimming']);
20             $table->string('nama_hewan');
21             $table->enum('jenis_hewan', ['Anjing', 'Kucing', 'Kelinci', 'Lainnya']);
22             $table->date('tanggal_reservasi');
```

5. Implementasi create() dan store() — dengan validasi nim (unique), nama (min:3), email (email|unique), jurusan (in:SI, TI, MI)

```
hunny-app > app > Http > Controllers > BookingController.php
16 {
17     public function create()
18     {
19         return view('booking.create');
20     }
21
22     public function store(Request $request)
23     {
24         $validated = $request->validate([
25             'nama_pemilik' => 'required|min:3',
26             'email' => 'required|email|unique:bookings,email',
27             'jenis_layanan' => 'required|in:Basic Grooming,Full Grooming,Spa & Treatment,Nail Trimming',
28             'nama_hewan' => 'required|min:2',
29             'jenis_hewan' => 'required|in:Anjing,Kucing,Kelinci,Lainnya',
30             'tanggal_reservasi' => 'required|date|after_or_equal:today',
31             'catatan' => 'nullable|string|max:500',
32             'foto_hewan' => 'nullable|image|mimes:jpg,jpeg,png|max:2048',
33         ]);
34
35         // Auto-generate kode booking
```

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

a. edit

```
hunny-app > app > Http > Controllers > BookingController.php
10 {
53 }
54 Windsurf: Refactor | Explain | Generate Function Comment | X
55 public function edit(Booking $booking)
56 {
57     return view('booking.edit', compact('booking'));
58 }
```

b. update

```
hunny-app > app > Http > Controllers > BookingController.php
10 {
57 }
58 }
59 Windsurf: Refactor | Explain | Generate Function Comment | X
60 public function update(Request $request, Booking $booking)
61 {
62     $validated = $request->validate([
63         'nama_pemilik' => 'required|min:3',
64         'email' => 'required|email|unique:bookings,email,' . $booking->id,
65         'jenis_layanan' => 'required|in:Basic Grooming,Full Grooming,Spa & Treatment,Nail Trimming',
66         'nama_hewan' => 'required|min:2',
67         'jenis_hewan' => 'required|in:Anjing,Kucing,Kelinci,Lainnya',
68         'tanggal_reservasi' => 'required|date',
69         'status' => 'required|in:pending,confirmed,done,cancelled',
70         'catatan' => 'nullable|string|max:500',
71         'foto_hewan' => 'nullable|image|mimes:jpg,jpeg,png|max:2048',
72     ]);
73     // Upload foto baru kalau ada
74     if ($request->hasFile('foto_hewan')) {
75         // Hapus foto lama kalau ada
76         if ($booking->foto_hewan) {
77             \Storage::disk('public')->delete($booking->foto_hewan);
78         }
79         $validated['foto_hewan'] = $request->file('foto_hewan')->store('foto_hewan', 'public');
80     }
81     $booking->update($validated);
82     return redirect()->route('booking.index')
83         ->with('success', 'Reservasi berhasil diperbarui! ✅');
84 }
85 }
86 }
87 }
```

c. validasi

```
hunny-app > app > Http > Controllers > BookingController.php
10 {
20 }
21 }
22 Windsurf: Refactor | Explain | Generate Function Comment | X
23 public function store(Request $request)
24 {
25     $validated = $request->validate([
26         'nama_pemilik' => 'required|min:3',
27         'email' => 'required|email|unique:bookings,email',
28         'jenis_layanan' => 'required|in:Basic Grooming,Full Grooming,Spa & Treatment,Nail Trimming',
29         'nama_hewan' => 'required|min:2',
30         'jenis_hewan' => 'required|in:Anjing,Kucing,Kelinci,Lainnya',
31         'tanggal_reservasi' => 'required|date|after_or_equal:today',
32         'catatan' => 'nullable|string|max:500',
33         'foto_hewan' => 'nullable|image|mimes:jpg,jpeg,png|max:2048',
34     ]);
35     // Auto-generate kode booking
36     $validated['kode_booking'] = 'HNW-' . strtoupper(Str::random(6));
37     // Upload foto hewan
38     if ($request->hasFile('foto_hewan')) {
39         $validated['foto_hewan'] = $request->file('foto_hewan')->store('foto_hewan', 'public');
40     }
41     Booking::create($validated);
42     return redirect()->route('booking.index')
43         ->with('success', 'Reservasi berhasil dibuat! 🎉');
44 }
45 }
46 }
47 }
```

7. Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus

```

hunny-app > app > Http > Controllers > BookingController.php
10 {
11     public function __construct()
12     {
13         //
14     }
15
16     // ...
17
18     // ...
19
20     // ...
21
22     // ...
23
24     // ...
25
26     // ...
27
28     // ...
29
30     // ...
31
32     // ...
33
34     // ...
35
36     // ...
37
38     // ...
39
40     // ...
41
42     // ...
43
44     // ...
45
46     // ...
47
48     // ...
49
50     // ...
51
52     // ...
53
54     // ...
55
56     // ...
57
58     // ...
59
60     // ...
61
62     // ...
63
64     // ...
65
66     // ...
67
68     // ...
69
70     // ...
71
72     // ...
73
74     // ...
75
76     // ...
77
78     // ...
79
80     // ...
81
82     // ...
83
84     // ...
85
86     // ...
87
88     // ...
89
90     // ...
91
92     // ...
93
94     // ...
95
96     // ...
97
98     // ...
99
100    }

```

8. Tambahkan flash message di layout dan tampilkan session('success') / session('error')

```

hunny-app > app > Http > Controllers > BookingController.php
10 {
11     public function __construct()
12     {
13         //
14     }
15
16     // ...
17
18     // ...
19
20     // ...
21
22     // ...
23
24     // ...
25
26     // ...
27
28     // ...
29

> @php artisan package:discover --ansi

 INFO  Discovering packages.

laravel/breeze ..... DONE
laravel/pail ..... DONE
laravel/tinker ..... DONE
nesbot/carbon ..... DONE
nunomaduro/collision ..... DONE
nunomaduro/termwind ..... DONE

78 packages you are using are looking for funding.
Use the "composer fund" command to find out more!
> @php artisan vendor:publish --tag=laravel-assets --ansi --force

 INFO  No publishable resources for tag [laravel-assets].

No security vulnerability advisories found.
Using version ^2.4 for laravel/breeze
```

2. Jalankan `php artisan migrate` untuk membuat tabel users

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app> php artisan migrate
● >>

 INFO  Running migrations.

2026_05_12_055214_create_bookings_table ..... 120.22ms DONE
```

3. Jalankan `npm install` && `npm run dev` untuk build assets
 - a. `npm install`

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app> npm install
added 63 packages, and audited 64 packages in 35s

16 packages are looking for funding
run "npm fund" for details
```

- b. `npm run dev`

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL\hunny-app> npm run dev
> dev
> vite

VITE v8.0.12 ready in 825 ms

→ Local: http://localhost:5173/
→ Network: use --host to expose
→ press h + enter to show help

LARAVEL v13.6.0 plugin v3.1.0

→ APP_URL: http://localhost
```

4. Coba register dan login di `http://127.0.0.1:8000/register`

5. Amankan semua route mahasiswa dengan middleware auth:
Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

```
PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL
\hunny-app> php artisan make:middleware CekAdmin

INFO Middleware [D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS
AKHIR PWEB LARAVEL\hunny-app\app\Http\Middleware\CekAdmin.php] created successfully.

PS D:\HUN\KULIAH\SISTEM INFORMASI\SEMESTER 4\PWEB HTML\ALL HTML\TUGAS AKHIR PWEB LARAVEL
\hunny-app>
```

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

7. Tambahkan nama user di navbar: {{ auth()->user()->name }}

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

9. BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login
